SPEEDY CUE

Cucumber

Cucumbers are fast growers. They only need about 50 days to go from a little shoot to a delicious, ready to eat cucumber. Speedy Cue was already fast and one day in April a burst of energy from the earth's molten core hit Speedy Cue's vine when he was a baby. It gave him the power to move underground with super-cucumber speed. Speedy Cue shared with all the cucumbers the copper, magnesium, potassium, and manganese he collected in the molten burst.

Now all the cucumbers in the world are good sources of these minerals that promote overall good health.

POW!

ARCH ENEMY

Drought. It slows Speedy Cue down and he can't grow as fast.
